Experience

ONIFY TECH Company

Jan 2025 – Sep 2025

Junior Full Stack Software Developer / Engineer

Asset Wins (Customer-facing Mobile App & Web Platform)

Served as a core developer for **Asset Wins**, a cross-platform mobile and web application built with **FlutterFlow**, supporting real-world asset management workflows.

- Led **Android and iOS production deployments**, managing build configurations, release pipelines, and cross-platform compatibility to ensure stable releases.
- Designed and developed **backend services using C# and .NET**, exposing secure and scalable RESTful APIs.
- Integrated **OpenAI APIs** to process and transform unstructured data formats (PDF, CSV, PNG) into structured, machine-readable outputs for downstream systems.

Beny (Internal Company Software Platform)

- Developed and maintained **full-stack web applications** using **Next.js, React, and Mantine**, delivering responsive and user-friendly internal tools.
- Implemented **authentication, authorization, and real-time data features** using **Supabase** as a backend-as-a-service platform.
- Conducted **API testing and documentation** using **Swagger**, ensuring consistency and reliability across services.
- Collaborated in an **Agile development environment**, using **Git** for version control and contributing to **CI/CD pipelines** for automated builds and deployments.

Education

James Cook University Singapore

Bachelor of Information Technology

June 2024

GPA: 6.04 / 7.00

Projects

Mobile Computing | Java

[Games](#) | [Utility](#)

- Launched fully functioning games (**Sudoku, MineSwipper**) and utility app (**Calculator**) using Java
- Implemented **object-oriented programming (OOP)** principles for modular and maintainable code
- Applied **recursive algorithms** for game logic and problem-solving.

Software Development | C++, NextJS, React, Python

[C++](#) | [NextJS + Google Sheet](#) | [Tripzone](#) | [React + Supabase](#)

- Proficient in **Python** and **C++**, with hands-on experience applying them in software development projects.
- Built full-stack web applications using **React, Next.js, Supabase**, and **Google Sheets API**, integrating frontend interfaces with backend databases and cloud services.
- Developed applications using object-oriented programming (OOP) principles and fundamental data structures such as arrays, linked lists, stacks, and queues.
- Applied algorithm design, debugging, and code optimization techniques to improve program efficiency and performance.
- Utilized programming and web development skills to solve real-world problems through academic and independent projects.

Content Management System & Web Development | Html, Css, Php

[Html + Css](#) | [Php](#)

- Developed dynamic websites using **HTML, CSS, and PHP**, with a strong focus on responsive design and functionality.
- Designed user-friendly interfaces and wireframes using **Figma**, applying UI/UX principles to improve usability and user experience.
- Built and integrated front-end and back-end components, implementing interactive features and server-side logic.

Skills

Languages: C#, Python, JavaScript, PHP, C++, SQL, Java, TypeScript

Frameworks: .NET, Next.js, React, Node.js

Databases: MySQL, PostgreSQL, Supabase

Tools: Weka, Tableau, Visual Studio Code, Android Studio, Azure Data Studio, GitHub, Docker
